

# **IRON MAN - PROJECT MANAGEMENT**

## **3D Printing Technician**

### **3D Printing Technician**

#### **Position Description (CONTRACT BASIS)**

Iron Man Project, a Delaware based 3D printing and additive manufacturing company is seeking a 3D Printing Technician to work in its Tigard facility. The person will be required to post-process and finish printed parts, operate 3D printers, thermoforming and machining equipment, and perform basic inspection and assembly tasks. Ideally, you will have some manufacturing or model shop experience, be comfortable working with your hands, and operating computer controlled technology.

This is a CONTRACT based position primarily working from 12-8pm with some flexibility up to 40 hours per week.

The company is growing rapidly, and this position has the potential to develop into a full-time position (depending on business needs and contractor's education and performance).

#### **3D Printing Technician Duties:**

- Perform post-processing and finishing of 3D printed parts.
- Operate 3D printers, thermoformers and machining centers
- Provide support in the maintenance and cleaning of the equipment
- Perform basic inspection operations with digital calipers, thread gauges, etc.
- Other assembly and general duties as required

#### **Requirements**

- AS Degree or two years of completed coursework in industrial design, engineering or related technical field
- Knowledge of 3D printer operation and maintenance preferred
- Knowledge of hand and power tool use preferred
- Knowledge of sanding, priming, painting preferred
- Proficiency with typical 3D CAD packages a plus

Must be reliable, customer focused and attentive to detail. Creativity encouraged.

Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.
